O NAMA
ABOUT US/
UBER UNS

Tvrta HOFER PRECIZNI ALATI d.o.o. osnovana je 1991. godine u Jastrebarskom, Hrvatska. Ulaganjem u nabavu novih strojeva i uvođenjem novih tehnologija tvrtka HOFER je proširila proizvodnju PCBN i PCD reznih alata za tokarenje, glodanje, razvrtavanje i upuštanje. Cilj naše organizacije je isporučivanje proizvoda i usluga visoke kvalitete za ispunjavanje potreba i očekivanja naših kupaca.

Company HOFER PRECIZNI ALATI Ltd. was founded in 1991 in Jastrebarsko, Croatia. By investing in purchase of new machines and by implementing new technologies company HOFER has expanded production capacity of PCBN and PCD tools for turning, milling, reaming and countersinking. Company HOFER goal is delivering products and services of high quality to fulfill our customers demands and expectations.

Firma Hofer PRECIZNI ALATI GmbH wurde im Jahr 1991 in Jastrebarsko, Kroatien gegründet. Durch die Investition in den Kauf neuer Maschinen und durch der Einführung neuer Technologien hat das Unternehmen den Betrieb und die Herstellung von CBN-und PKD-Werkzeuge für Drehen, Fräsen, Reiben und Senken erweitert. Firma Hofer Ziel ist es, Produkten und Dienstleistungen von höchster Qualität liefern für unsere Kunden Anforderungen und Erwartungen zu erfüllen.

PCBN

PCBN REZNI MATERIJALI I ZNAČAJKE PCBN CUTTING MATERIALS AND CHARACTERISTICS/ PCBN SCHNEIDSTOFFE UND LEISTUNGEN

Polikristalni kubni bornitrid, PCBN, je umjetni supertvrdi materijal dobiven spajanjem kubnog bornitrida s keramičkim ili metalnim vezivom pri visokim tlakovima i temperaturama.

PCBN je pogodan za visokobrzinsku obradu željeznih slitina poput sivog lijeva, nodularnog lijeva, kaljenih čelika, praškastih metala, tvrdog metala i superlegura.

Polycrystalline cubic boron nitride, PCBN, is a synthetical, extreme hard material produced by bonding cubic boron nitride with ceramical or metal binder under high pressures and temperatures.

PCBN is applicable for high speed machining of ferrous materials as gray cast, nodular cast, hardened steels, PM, cemented carbide and superalloys.

Polykristallines kubisches Bornitrid ist ein synthetisch hergestellter, extrem harte Material, erhalten durch die Zusammenlegung aus kubischem Bornitrid mit keramischer oder metallischer Binderphase bei hohen Temperaturen und Drucken.

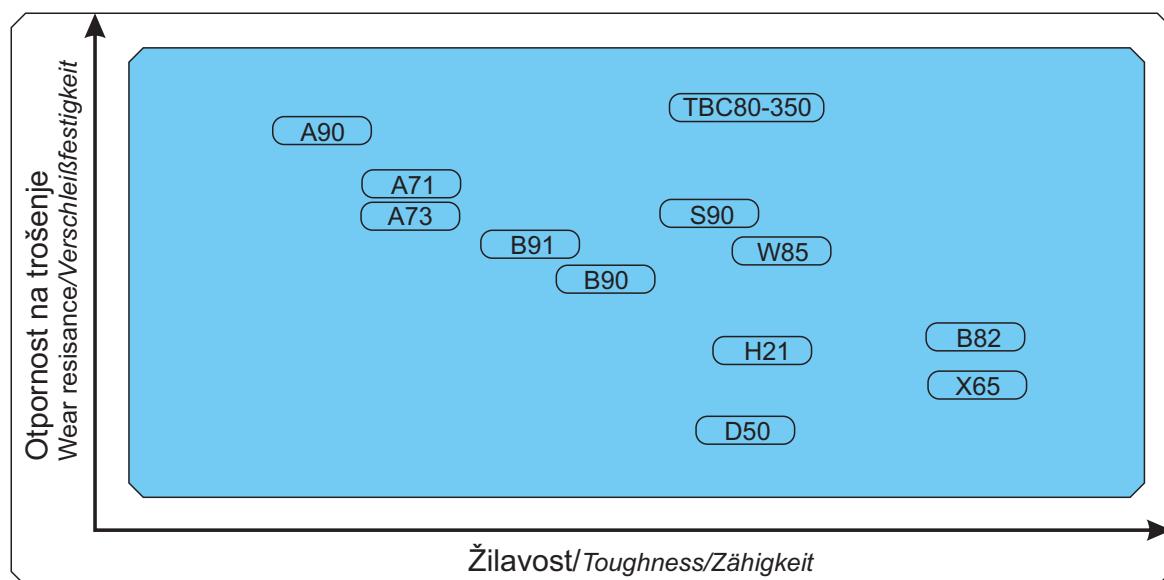

PCBN ist anwendbar für die Hochgeschwindigkeitsbearbeitung von eisenhaltigen Materialien wie Grauguss, Sphäroguss, gehärteten Stählen, PM, Hartmetall- und Superlegierungen.

PREDNOSTI PRIMJENE PCBN-a

- visoka tvrdoća
- velike brzine rezanja
- veliki posmaci
- stabilnost obrade
- veća proizvodnost
- dugotrajnost rezne oštice
- smanjeni trošak izmjene alata
- smanjenje troškova proizvodnje
- veći kapacitet proizvodnje bez dodatnog ulaganja u nove strojeve

PCBN ADVANTAGES/PCBN VORTEILE

- high hardness/hohe Härte
- high speed machining/ Hochgeschwindigkeitsbearbeitung
- bigger feeds possible/größere Vorschübe möglich
- stable machining conditions/stabile Bearbeitung
- higher production output/höhere Produktionsleistung
- long tool life/lange Standzeiten
- reduced tool change cost/Werkzeugwechsel reduziert Kosten
- overall production costs decrease/gesamten Produktionskosten senken
- greater production capacity without investing in new equipment/Höhere Produktionskapazität ohne Investitionen in neue Anlagen

PREPORUKE ZA PRIMJENU PCBN-a

**RECOMMENDATIONS FOR APPLICATION OF PCBN TOOLS/
EMPFEHLUNGEN FÜR DIE UMSETZUNG DER PCBN WERKZEUGE**

- Koristiti strojeve s dovoljno snage
 - Odabratи najveći mogući polumjer vrha alata radi veće čvrstoće oštice
 - Odabratи negativne rezne geometrije s većim ulaznim kutevima
 - Smanjiti prevjes alata
 - Koristiti rezne pločice s odgovarajućom fazetom kod prekidnog reza
 - Na vrijeme promijeniti istrošeni rezni vrh i ne zaustavljati stroj prilikom obrade zbog mogućeg loma rezne pločice
 - Ne koristiti rashladno sredstvo kod prekidnog reza
 - Kod obrade sivog i nodularnog lijeva udio ferita ispod 10%, starost odljevaka najmanje 10 dana
 - U pravilu ne koristiti tekućinu za hlađenje
-
- *Use rigid machining system with sufficient power*
 - *Use largest radius possible to maximize tool strength*
 - *Use negative rake tools and largest lead angles whenever possible*
 - *Minimize insert overhang*
 - *Use chamfered edge to minimize chippage on interrupted cuts*
 - *Do not overuse cutting edge or stop machine in cut as insert breakage may occur*
 - *Do not use coolant on interrupted cuts*
 - *Machining of gray and nodular cast with ferrite content below 10%, minimum 10 days aged castings*
 - *enerally do not use coolant fluid*
-
- Verwenden Sie stabile Bearbeitung System mit ausreichend Leistung
 - Verwenden größten Radius möglich zu maximieren Werkzeug Stärke
 - Verwenden Sie negative Rechen-Tools und größte Blei-Winkel, wann immer möglich
 - Minimierung der Wendeschneidplatte Überhang
 - Verwenden Sie Wendeplatten mit abgeschrägte Kante auf unterbrochenen Schnitt
 - Ändern getragen Schneidkante und stoppen Sie nicht die Maschine bei der
 - Bearbeitung da ist Wendeplatte Bruch möglich
 - Verwenden Sie kein Kühlmittel auf unterbrochenen Schnitt
 - Bearbeitung von Grau-und Sphäroguss mit Ferrit-Gehalt unter 10%, Minimum 10 Tage gealtert Guss
 - Verwenden Sie grundsätzlich kein Kühlmittel

*Napomena: za najbolji učinak potrebno je usklađivanje parametara obrade s uvjetima obrade. Molimo, upitati HOFER za preporuku parametara prema vrsti obrade i PCBN reznom materijalu .

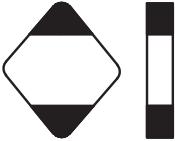

Note: for best machining results optimisation of cutting conditions required.
Please, contact HOFER experts for machining type and PCBN grade application field.

Bemerkung: für beste Bearbeitungsergebnisse Optimalisierung des Schneidens Bedingungen erforderlich.
Bitte kontaktieren Sie HOFER Experten für die Bearbeitungstyp und PCBN-Sorte Anwendungsfeld.

PCBN BRUŠENJE I HOFER 13

PCBN RE-GRINDING SERVICE AND HOFER 13/

PCBN NACHSCHLEIFEN UND HOFER 13

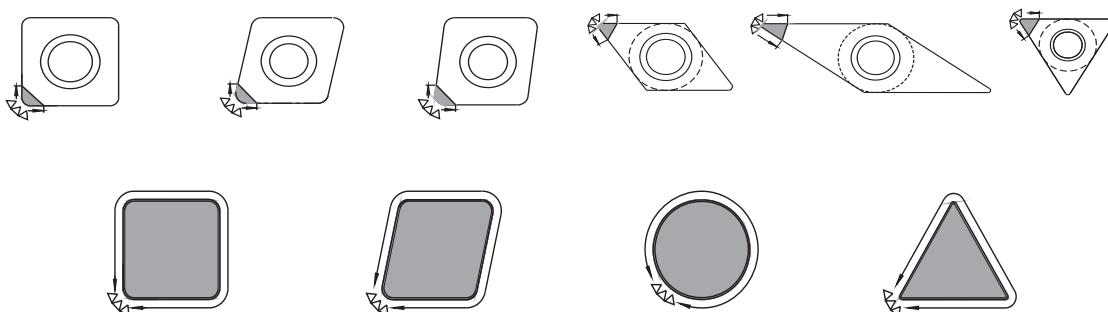

Tvrta HOFER nudi usluge brušenja PCBN alata što dodatno snizuje troškove reznog alata. Takoder, uz standardni ISO program alata nudimo i alate izrađene izvan ISO sustava, a što omogućuje naknadno brušenje. Prosječna cijena brušenja je 20-30% cijene novog alata. Razvrstavanjem i brušenjem alata postiže se kvaliteta rezne oštice istovjetna kvaliteti novog alata. Za sva pitanja u vezi brušenja i prijedloga za smanjenje troškova obratite nam se s punim povjerenjem.

Company HOFER offers grinding service of P CBN tools which results in further tool cost decrease.

Also, besides standard ISO cutting tools, we offer tools made out of ISO system which enables regrinding service. Average grinding service price is about 20-30% of new tool cost. By sorting and grinding worn tools same cutting edge quality is achieved as with new tools.

For all further questions about grinding service, please contact us with full trust.

Firma HOFER bietet Schleifservice von CBN Werkzeuge, die in weiteren Werkzeugkosten Rückgang führt. Auch, neben ISO Schneidwerkzeuge, bieten wir Werkzeuge aus ISO System, das Nachschleifen Service ermöglicht gemacht. Durchschnittliche Schleifservice Preis ist etwa 20-30% des neuen Werkzeugs Kosten. Durch das Sortieren und Schleifen verschlissene Werkzeuge dieselbe Schneide Qualität als mit neuen Werkzeugen erreicht. Für alle weiteren Fragen um Schleifen Service, kontaktieren Sie uns bitte mit vollem Vertrauen.
